PROFESSIONAL EXPERIENCE

Program Analyst — Cognizant Technology Solutions

Jan 2025 – Present · Chennai, India

- Designed and deployed the **Migration Acceleration Toolkit (MAT)**, a full-stack Azure application built with **Python** in 10 days, reducing manual migration effort by **80%**.
- Drove a Xerox DocuShare → SharePoint Online migration of **6.7 TB** of enterprise data; delivered 1 TB in 6 weeks with full metadata, version and permission integrity.
- Owned migration workflow design, **validation logic**, **retry handling** and root-cause troubleshooting for failed batches, improving reliability and reducing reprocessing.
- Applied **GenAI / prompt engineering** (Gemini in VS Code) to automate repetitive workflows and accelerate debugging.

PROJECTS

Migration Acceleration Toolkit (MAT)

Python · Azure · Full-Stack · GenAI

Production-ready full-stack Azure app built in 10 days; powers part of a 6.7 TB enterprise migration and cuts manual effort by 80% through automated validation and batch processing.

ForecastAI — Revenue Forecast App

React 18 · TypeScript · Node.js · Azure SQL · Microsoft Graph

Enterprise app with CSV revenue import & validation, multi-level approval workflow (Practice Lead → Head), interactive charts and Outlook email via MS Graph; deployed on Azure SWA + App Service with GitHub Actions CI/CD.

No-Net-Rescue — Offline Emergency App

React · Node.js · Express · Azure DevOps

Emergency communication app that works without internet connectivity, enabling critical messaging and rescue coordination in offline zones.
